NASA delays Artemis 2 moon mission to 2026, Artemis 3 astronaut landing to mid-2027

Mike Wall December 5, 2024

NASA's uncrewed Artemis 1 Orion spacecraft takes a selfie near the moon in November 2022. (Image credit: NASA)

We'll have to wait a bit longer to see the first crewed moon mission since the Apollo era lift off.

NASA announced today (Dec. 5) that it's delaying the planned launch of [Artemis 2](#), a flight that will send four people around [the moon](#) and back, from September 2025 to April 2026. And [Artemis 3](#), a crewed moon landing that had been targeted for late 2026, is now scheduled for mid-2027. The extra time is needed primarily to finish prepping the [Orion](#) capsule for its first-ever crewed flights, according to NASA officials. To learn more click the link: <https://rb.gy/grhsrt>
